

Dealer Training — Fall 2010

Latest developments, innovations, and modifications

Experience an in-class, hands-on, three-day seminar led by highly qualified MechoShade Systems' sales representatives, project managers, and company officers. Learn about the full range of products and services through the Dealer Training program, including:

Daylighting—Uncover WindowManagement® strategies, which maximize natural daylight and minimize energy costs.

Shading systems—Determine the correct procedures for specifying and installing MechoShades® and ElectroShades®.

Configurations—Fully comprehend the advantages of single-banded, multibanded, bottom-up, angled, and SkyLighter® shades.

Shadecloth—Discover the key selling features about MechoShade Systems' extensive range of sunscreens, including their solar properties.

Demonstrations—Engage in personal involvement in the training. Pick up programming and installation tips on the company's latest high-tech systems. Featured products include the IQ/MLC® and IQ/485®-SMC, utilizing one-way communication; the IQ/485®-NI with two-way communication; and the WhisperShade® IQ® and I-Con®.

Fall schedule—If you wish to attend, contact your sales representative to reserve the session, which best suits you.
 September 23–25
 October 21–23
 December 2–4
