

The award-winning UrbanShade™ System

UrbanShade has racked up three more awards this year—evidence that the design community feels, as we do, that it's one of the best and most innovative new window-shade products on the market.

2010 Industry recognition:

- CE Pro BEST Award, CEDIA Expo
- EXC!TE Award, CEDIA Expo
- Gold Award, Best of NeoCon

Its innovative design puts it far beyond the capabilities of most standard shades. Here's why the industry is singing its praises.

Flexible—Universal-bracket design enables wall, ceiling, or jamb mounting, streamlining installation, reducing errors, and saving time and money. SnapLoc® mini-spline technology allows shade cloths to be easily switched.

Decorative—A broad range of shade cloths and accessories is available, including brackets, fascia, end caps, end plates, and other components. Fascia is available in square or radius configurations, with or without matching shade cloth wrapping, in seven colors: White, Clear Anodized, Grey, Quaker Bronze, Black, Colonial White, and Alabaster.
