

Two at the Same Time.

UrbanShade® Double-Bracket System

The UrbanShade family now features an economical two-shade-band system which:

- Allows two individual shade bands to be offset-mounted on a single bracket.
- Supports any combination of motorized- or manual-lift systems.
- Eliminates the need for two separate brackets.
- Reduces labor, installation time, and cost.

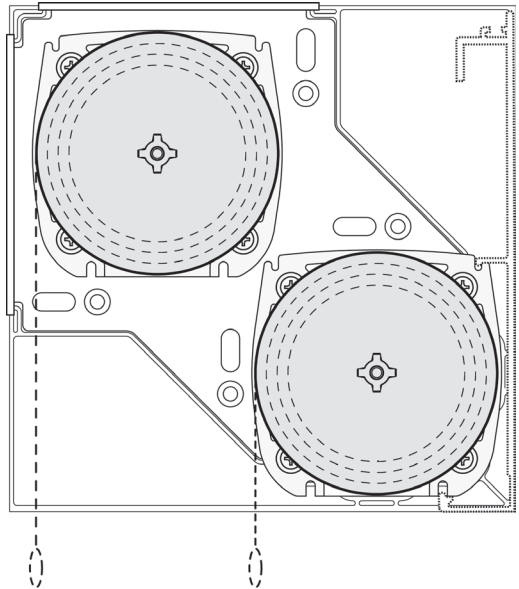

The UrbanShade Double Bracket can darken a room with maximum privacy or allow views to the outside with solar protection by raising only the opaque shadecloth. When making privacy possible, one shade band would be an opaque shadecloth and the other would be one of a number of shadeclths with a choice of openness factors.

Features

- Available in a compact size of 5.22 x 5.22 in. (13.3 x 13.3cm).
- Fascia: square or radius, and continuous, in a wide range of colors.
- Suitable for home theaters, media and conference rooms, and bedrooms.
- Cost effective.
- Aesthetically pleasing.
- Strong brackets made of metal with high-density plastic sheaths.

- Upgradeable from manual to motorized in the field without necessitating a new shade band.
- Choice of battery-powered or low-voltage powered motors with various control options: low voltage, dry contact, RS485, or wireless RTS.
