

### More construction drawings are available.

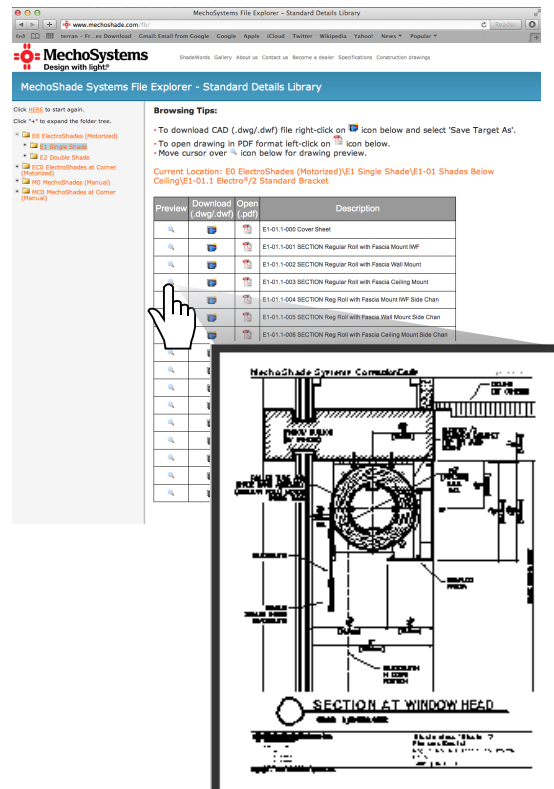

We've expanded our popular Standard Details Library to include more CAD drawings. The collection represents common and specialized shade-installation scenarios. Now, 180 more drawings are available.

#### Drawings made handy

To view and download drawings, visit [mechosystems.com](http://mechosystems.com) and click on "Construction drawings" in the top right corner.

Drawings are available in PDF and DWG formats. A preview shows whether you've found the right file without having to download it first. Just hover your cursor over the adjacent icon and an image will pop up.

We've made it available to architects and designers as well as dealers. No login is required. This easy access to the collection will save time and show how products can be installed under a variety of structural conditions.

Suggestions about what else we can do to improve our library? Let us know at [marketing@mechosystems.com](mailto:marketing@mechosystems.com).
